Scaler NSET Preparation Kit

Welcome to our test preparation guide for your upcoming ScalerNSET. This guide provides practice papers, test guidelines and important dos and don'ts for students taking an AI-based proctored test from home, to help ensure a smooth and successful test-taking experience.

DOs:

- Ensure that you have a reliable internet connection and a quiet, distraction-free environment to take the test in.

- Test your computer, webcam, and microphone ahead of time to make sure they are working properly.

- Follow all the instructions provided for the AI-based proctoring, including any necessary software installations or system checks.

- Dress appropriately and make sure that your face is clearly visible to the camera throughout the test.

- Maintain eye contact with the camera as much as possible and avoid looking away or around the room.

- Remain seated and in view of the camera at all times unless otherwise instructed.

- Inform the proctor or test administrator if you experience any technical issues or other problems during the test.

- Follow the same test-taking strategies as you would for an in-person exam, including pacing yourself and managing your time effectively.

DON'Ts:

- Don't engage in any behaviour that could be interpreted as cheating or academic dishonesty, such as looking up answers online or using unauthorised study materials.
